

HOW WE WORK

Understand it before you build it.

The expression is the discovery. We walk through the real behaviour until everyone can point at the same thing.

Is it worth it?

Run the cheapest credible test first.

What is it?

Define the product through concrete examples.

What happens?

Lay out commands, events, and views over time.

Can we prove it?

Build the feedback loop that makes the claim measurable.

8EXAMPLES.COM

FOLD

8Examples

Bring the complicated thing.

A product, a stubborn workflow, a website that needs to earn its keep, or an AI worker with a real job to do.

FOLD

8Examples / think it through

You can't shortcut understanding.

Digital products, websites, and AI workers built from concrete examples, clear timelines, and working proof.

8EXAMPLES.COM →

Real systems. Measurable outcomes.

Three minutes, eighty machines, one report.

Finning's end-to-end test suite went from hours on one machine to three minutes across eighty replicas.

20% → 80% USE-CASE COVERAGE

Three thousand databases, nobody watching.

An autonomous SQL Server-to-Postgres loop repairs translations and proves equivalent behaviour.

3,000 DATABASES · DIFFERENTIAL PROOF

A store where nothing comes in twos.

DiscRepublic's one-of-one inventory runs from an append-only ledger and patient background jobs.

ONE FACTUAL TIMELINE

A link, not an account.

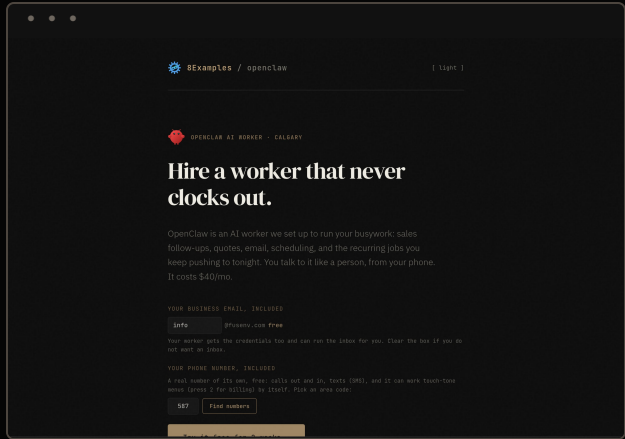

Private family photo albums use one admin password and simple shareable guest links.

ONE SMALL SERVER · NO GUEST ACCOUNTS
